News
The Globe and Mail, Tuesday, Feb. 12, 2013

BlackBerry users were in withdrawal after a massive outage cut off their e-mails. BlackBerry maker Research in Motion, the maker of the BlackBerry, said it was working towards a solution to the service disruption. The company did not provide an update on its progress, but it was expected to be resolved on Tuesday. BlackBerry users were frustrated after forums were flooded with complaints. The outage was the latest in a series of disruptions for the company, which has been struggling to compete with Apple's iPhone and Google's Android smartphones.

The outage was the latest in a series of disruptions for the company, which has been struggling to compete with Apple's iPhone and Google's Android smartphones.
